

## Plant Lab IV Sample Paragraph

In Plant Lab IV, we **studied** stems. **First** we look at the general stem structure of four plants, then we examined microscope slides of monocot and dicot stems and leaves. For general stem structure, we started with \_\_\_\_\_ (*Species*), had stems \_\_\_\_\_ cm long and \_\_\_\_\_ cm wide, with an average \_\_\_\_\_ degrees between stems. The **second** plant that we **studied**, \_\_\_\_\_, . . . . After studying general leaf structures, we used prepared microscope slides to examine the vascular bundles of monocots and dicots. In the **first** slide that we saw of the monocots (\_\_\_\_\_), we saw that its vascular bundles were arranged in \_\_\_\_\_. For the dicot, its vascular bundles were arranged in \_\_\_\_\_. . . . **In summary**, . . . .
